EDUCATION

B.Sc. EEE
Jatiya Kabi Kazi Nazrul Islam University — Present
HSC
Agricultural University College, Mymensingh
JSC / SSC
Polisha High School
PSC
Protiva Pre-Cadet & Academy

CORE SKILLS

Python / Embedded C / Arduino
Microcontrollers (AVR / ESP32)
Sensor Integration
Robotics & Mechatronics
PCB & Circuit Design
IoT Systems
GPS / GSM Modules
Control Systems
Power Electronics
Biomedical Sensors (EMG / ECG)

LANGUAGES

Bengali — Native
English — Professional

IMAM MEHEDI HASAN

Electrical & Electronic Engineering Student | Robotics & Automation

PROFILE

Electrical & Electronic Engineering student at Jatiya Kabi Kazi Nazrul Islam University with hands-on experience across 16 independent and competition robotics projects. Skilled in embedded systems, sensor integration, and control design, with a track record of taking ideas from concept to working prototype. Seeking opportunities to apply this foundation in a professional engineering environment.

PROJECT PORTFOLIO

ROBOTICS & MECHATRONICS

Human Following Robot

Python + MediaPipe pose-mesh tracking to autonomously detect and follow a person.

Line Following & Obstacle Avoidance Robot

Tracks a line path and reroutes automatically around obstacles.

Soccer Bot

Competition robot engineered for robotic soccer contests.

Hexapod

Six-legged walking robot capable of traversing uneven terrain.

Wall Climbing Robot

Suction-based robot that climbs vertical surfaces.

Robotic Hand

Mechanical hand replicating human finger movement for grip tasks.

AUTOMATION & IOT

Home Automation

Digitalized home appliances with full remote control.

Smart Irrigation System

Automated watering triggered by soil and environmental data.

Smart Street Light Control

Adjusts street lighting automatically based on ambient conditions.

Smart Electricity Theft Detection

Detects grid theft and sends GPS-tagged alerts to the nearest substation.

Smart Fingerprint Attendance System

Biometric fingerprint-based attendance logging.

SAFETY & HEALTH TECH

Safety Car

Vehicle concept built around layered passenger safety systems.

EMG-Based Alcohol Detection & Signaling

EMG sensor detects driver impairment and signals in-cabin.

Remote ECG Monitoring

Real-time remote cardiac monitoring and reporting.

Emergency Alert System

Rapid-dispatch alert system for emergency situations.

ENERGY

Piezoelectric Power Generation & Storage

Converts mechanical vibration into stored electrical energy.
